

Airservices' National PFAS Management Program

Mackay Airport
(Airport Lessee/Landowner)

Airservices conducting site investigations at Mackay Airport, including sampling of soil, groundwater and surface water

General Environmental Monitoring
(groundwater, surface water, sediment)
+
Baseline Contamination Assessments
Pre-development or lease renewal

Airservices Australia,
(Polluter) + Department of Environment and Science
(Regulator) + Queensland Health (Health Agency) +
Department of Fisheries

Results will determine next steps in management and remediation

Mackay Airport takes a collaborative approach to PFAS management, working with the polluter, government regulators, public health department, and independent bodies/agencies.
